Skills Summary

Languages: Javascript | HTML5 | CSS3 | Ruby | Node | SQL

Frameworks: Angular | JQuery | Bootstrap | Rails | Flexbox

Principles: Object Oriented Programming | REST APIs | MVC | Github | Pair Programming

Technical Portfolio

General Assembly Web Development Immersive Program - <https://generalassemb.ly/>

Full-stack web development program focused on best practices in modern web design and application development. Curriculum included object oriented programming, test-driven development, MVC frameworks, agile workflow, and daily collaboration with pair programming.

Green Thumb Garden Designer - <https://green-thumb-design.herokuapp.com/>

This MEAN stack garden designer app allows the user to create a one-of-a-kind garden layout. Built with a focus on user interaction, the app features Angular UI drag and drop, Bootstrap modals, and Angular's two-way data binding.

Angular Profile Page - <https://www.jaredarkin.com>

My portfolio website is a single page application built with Angular 1.x and ui-router.

Photo Sharing App - <https://photos-of-paul.herokuapp.com/>

A Ruby on Rails photo sharing app dedicated to guys named Paul. The app has user authentication and authorization, password hashing, and file upload using AWS.

Rails Address Book - <https://codename-address.herokuapp.com/>

This single page Rails app uses AJAX calls to update the SQL database and the view without a page refresh.

Education

General Assembly Web Development Immersive | Washington, DC | June 2015 - Sept 2015

Virginia Commonwealth University | Richmond, VA | 2003 - 2006 | Finance
